

SIM 2021

The 7th Int'l Conference on Surface and Interface of Materials (SIM 2021) will be held from January 8-10, 2021 in Sanya, China. This Conference will cover issues on Surface and Interface of Materials. It dedicates to creating a stage for exchanging the latest research results and sharing the advanced research methods.

CALL FOR PAPERS

C o n f e r e n c e D a t e : January 8-10, 2021

V e n u e : Sanya, China

R e g i s t r a t i o n D e a d L i n e : January 8, 2021

Topics of interest for submission include, but are not limited to :

Adsorption and desorption
Bio-surfaces and interfaces
Chirality at surfaces and enantiosensitive reactions
Dynamical phenomena at surfaces:
Space-/Time-/Energy-resolved
In situ reactions on metal surfaces and nanoparticles
Electrochemistry at surfaces
Electronic and optical properties of surface structures
Heavy atoms, lanthanides and actinides at surfaces
Liquid/solid interfaces
Metal, alloy and quasicrystal surfaces
Molecular self-assembling at surfaces
Nano materials, thin carbon layers and graphene
New techniques for study of surfaces and interfaces
Non-covalent Interactions
Novel methods: Instrumentation, Facilities and Computation
Oxide surfaces and thin/ultra-thin oxide films
Piezo and ferroelectricity at surfaces
Polymer surfaces and interfaces
Self-healing surface structures
Semiconductor surfaces
Surface chemical reactions, kinetics and heterogeneous catalysis
Surface diffusion and growth
Surface engineering
Surfaces in space
Surface/interface science of energy materials: PV, batteries, fuel cells, etc.
Surface magnetism

Publication and Presentation

Publication: Open Access Journal.

Index: CNKI and Google Scholar

Note: If you want to present your research results but do NOT wish to publish a paper, you may simply submit an Abstract to our Registration System.

Venue

Sanya is superior in geography climate and natural resources. It is known as "the oriental Hawaii" and "Sunshine City" because of its special tropical scenes as well as its attractive nature. Sanya's tourist resources, richly endowed by nature, are not only special in China, but also rare in the world. It is a most fashionable place where tropical marine tourist resources are closely concentrated and lovers of swimming can enjoy their holidays in winter. Within the city, well-known tourist spots are dotted everywhere--the national Yalong Tourist Area, the Tianyahaijiao, the Great Eastern Sea, the Luhuitou Peninsula, Sanya Bay and the Luobi Grotto. Besides these, there remain the ancient Yazhou City and relics and a sculpture of the Monk Jianzhen of the Tang Dynasty, who landed ashore to avoid the storm when he was sailing eastwards to Japan.
